Jungle Parade 600 x 600

### Design & Quality

Pimpelmees designs are known for their detail and originality allowing patients to relax and take their mind off the dental procedure. The print process, and the light source used, assure that there is no glare or blinding effect and that the light is free of 50Hz flicker would otherwise make the light uncomfortable.

### Workplace light

The combination of the backlit photo panels with Dentled full spectrum daylight LED panels to illuminate the treatment room create a pleasant and comfortable work environment with positive distraction for both patients and dental workers.

### Request a Sample

The only way to truly experience the quality is by experiencing it, please feel free to request a sample or demonstration, call or email us to arrange a sample.

### Key benefits

- Dental treatment rooms are transformed into natural environments
- will cause a positive distraction to patients during painful or stressful treatments
- contributes to a pleasant working environment for dentists and their assistants
- will make your dental practice stand out and emphasise care
- stifling rooms are given an open and spacious character
- LED's are energy efficient and use off flicker-free high quality drivers
