

Full Daylight Spectrum
Healthy Lighting

PHL18 Light Line White 1756mm Full Spectrum dual-linear dental lighting

Reduce fatigue & Improve ergonomics

A pair of full-spectrum, linear, and bidirectional LED lamps, each measuring 1756 mm in length. Two independent lamps offer flexibility in installation as required. Bidirectional lighting guarantees uniform illumination across the treatment room. This ensures clear and comfortable lighting, optimizing conditions for precision dental work.

Incorrect lighting in dental treatment rooms leads to eyestrain and fatigue. DentLed's full-spectrum lighting was developed specifically as the optimal work light for dental treatment rooms.

Key features & benefits

- Direct/Indirect lighting: Uniform light distribution across the treatment room.
- High Colour rendering for accurate shade matching (CRI >97).
- Flicker free: no fatigue inducing flicker.
- Low glare: Light is not harsh & unpleasant on they eyes.
- High output: 1500–2000 lux at the oral cavity.

Technical specifications

PHL18	
Output (lumen)	2 × 8050 lm
CRI (Colour Rendering)	97+
CCT (Colour Temp)	5000 K
Efficacy	High Efficiency
Power Consumption	2 × 75 W Fixed Output
Dimensions	1756 × 50 × 75 mm
Weight	2 × 6 kg
Colour	White RAL 9016, black RAL 9005, grey RAL 9006 or custom color
Flicker Free	Yes, visible & invisible
Lifetime	100 000 h L80B20 at 25°C
Power Cord Length	3 m
Max Suspension	2 m
Direct/Indirect	Direct/Indirect High Efficiency
UGR	<17,8
Suspension Points	flexible
Options: ceiling mount / dimming / colour / etc.	Please inquire

Light intensity distribution

This diagram illustrates the optimal light distribution in a dental treatment room, aiming for 1500-2000 lux around the oral cavity.
